Product Overview

Diamond Vacuum Brazed Hole Saw

This diamond vacuum brazed hole saw is engineered for high-efficiency drilling across a variety of hard materials, including granite, marble, ceramic, and glass. Utilizing advanced vacuum brazing technology, it offers superior durability and a longer service life compared to standard electroplated tools. Designed for both wet and dry applications, it ensures fast, smooth drilling with excellent chip removal performance.

Technical Specifications

Available Diamond Grits

- #30
- #40
- #50

Available Size Range

8mm - 120mm

Diamond Tip Height

10 mm

Compatible Shank Types

M14, Hexagonal Shank, Round Shank

Performance Metrics

Performance Highlights

10 mm

Diamond Tip Height

120 mm

Max Size

Application & Compatibility

Compatible Materials

Granite • Marble • Ceramic • Glass • Porcelain • Tile

Usage Environment

Wet and Dry
