

Diamond Wet Cutting Discs

Professional-grade diamond cutting discs are designed for wet cutting applications. The durable steel core features embedded diamond segments for efficient and precise cutting of various materials, including tiles, stone, and concrete.

Overview

Professional Diamond Wet Cutting Discs

These professional-grade diamond cutting discs are engineered for high-precision wet cutting applications. Featuring a durable steel core with embedded diamond segments, they are designed to deliver clean, efficient cuts with minimal chipping. The discs are optimized for use with a continuous water supply to ensure effective cooling and dust reduction, making them ideal for demanding construction and renovation tasks.

Technical Specifications

Diameter	125 mm
Arbor Size	22.23 mm

Application

Usage Method
Wet Cutting Only

Compatible Tools

- Angle Grinders
- Tile Saws

Compatible Materials Concrete, Stone, Ceramic Tile, Wall Trough
