

# Diamond Wire Saw for Stone Cutting

This diamond wire saw is used for cutting granite, marble, reinforced concrete, steel, and metal structures. It features high-quality diamond beads and a durable steel cable.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Diamond Wire Saw

This diamond wire saw is engineered for demanding cutting applications, including granite, marble, reinforced concrete, and metal structures. Featuring high-quality diamond beads and a robust steel cable imported from Belgium, it ensures superior durability and cutting precision. The assembly utilizes advanced vulcanization and sintering techniques to provide consistent performance in industrial environments such as mining, construction, and demolition.

## Technical Specifications

<b>Bead Density</b>	40 beads/m
<b>Bead Composition</b>	Diamond, Cobalt Powder
<b>Fixation Method</b>	Rubber and spring fixation

## Applications

### Compatible Materials

- Granite
- Marble
- Reinforced concrete
- Steel structures
- Metal structures
- Buildings
- Bridges
- Shipwrecks
- Cables
