

Diesel Auto Engine with Turbocharger

This is a high-performance auto engine with a turbocharger and fuel injection system. It is a diesel engine featuring high-pressure fuel lines connected to individual injectors.

Overview

High-Performance Diesel Engine

This high-performance auto engine is engineered for demanding automotive applications, featuring an integrated turbocharger for enhanced power delivery. The system includes a sophisticated fuel injection setup, an efficient air compressor, and a robust oil filtration system. Designed with precision, this unit is built to handle rigorous operational requirements with reliability and efficiency.

Technical Specifications

Configuration

- Belt-driven accessories
- High-pressure fuel lines
- Individual fuel injectors

Compliance & Features

Turbocharged • High-Pressure Injection

Model Designation

MGK 300

Engine Type

Diesel Engine

Key Components

Turbocharger, Air Compressor, Fuel Injection System, Oil Filtration System, Multi-blade Fan
