Product Overview

Robust Diesel Water Transfer Solution

This single-cylinder diesel cast iron water pump is engineered for heavy-duty water transfer tasks in demanding environments. Featuring a durable cast iron construction, it offers exceptional longevity and reliability for irrigation, construction sites, and emergency water supply. Its diesel-powered engine ensures stable operation and cost-effectiveness, making it the perfect choice for remote locations where electrical infrastructure is limited.

Technical Specifications

Engine Type	Single-cylinder diesel
Body Material	Cast Iron
Key Features	Protective Frame, Portable, High Flow Rate, Diesel Powered

Certifications

Regulatory Compliance
CE Certified • ISO 9001

Applications

Suitable Applications

- Agricultural Irrigation
- Construction Site Dewatering
- Emergency Water Supply
- Remote Power Operations
