

Diesel Concrete Cutter and Timber Saw

This diesel concrete cutter and timber saw is designed for cutting concrete, asphalt, and wood. It features a robust frame, a high-speed cutting blade, and a water cooling system.

Product Overview

Ergonomic control structure for managing the powerful cutting mechanism.

Professional Concrete & Timber Cutting Solution

This versatile cutting machine features a robust frame designed for high-speed cutting of concrete, asphalt, and timber. It utilizes a powerful diesel engine with a stepless speed change system, effectively reducing operator labor intensity during deep cutting tasks. The unit is equipped with a large-capacity, anti-rust water tank to support diamond blade cooling, which ensures consistent performance and extends the lifespan of cutting components.

Technical Specifications

Robust frame construction designed for industrial road and repair applications.

Precision engineered cutting head providing stability during deep operations.

Power Source	Diesel engine
Power Output	S185.8PS
Rotary Speed	2200 r/min
Compatible Blade Diameter	50-500mm

Physical Dimensions

Dimensions (L*W*H)	1500*550*900mm
Weight	235 kg

Key Features

Versatile industrial machinery suitable for diverse construction and wood processing tasks.

Core Capabilities	Concrete Cutting, Asphalt Cutting, Timber Sawing, Water Cooling System, Stepless Speed Control
