

# Diesel Engine and Generator Set

This series 26/32 engine includes V-12, 16.18 cylinders and in-line 6.8.9 cylinders. The diesel engine and generator set is designed for high power output, low fuel consumption, and high reliability, making it suitable for various power equipment applications.

## Overview

### High-Performance Power Generation

The 2632 series diesel engine and generator set is a robust, integrated power solution designed for continuous operation. Featuring a multi-cylinder configuration with advanced individual cooling systems, it ensures thermal stability and reliable performance. Mounted on a heavy-duty skid base, this unit is engineered for easy installation and transport, making it suitable for prime power, standby applications, and peak shaving.

## Technical Specifications

Engine Series	2632 Series
Cooling Configuration	Individual fans per cylinder bank
Mounting	Heavy-duty skid base

## Features

Operational Capability	Continuous Operation
Suitable Applications	Prime Power, Standby Power, Peak Shaving
Control & Monitoring	Yes
