

Diesel Engine Animal Feed Pellet Mill

This pellet mill processes various grains and agricultural materials into small pellets for animal feed. It features a diesel engine, a vertical pelleting chamber, and adjustable pellet size.

Product Overview

Versatile Pellet Production

This diesel engine pellet mill is engineered to convert various agricultural and biomass materials into uniform, high-quality pellets. It is suitable for processing grains, straw, sunflower stalks, wood chips, and forestry waste, making it an excellent solution for animal feed production or biomass fuel creation. The machine features a robust design capable of producing smooth, clean pellets that are easy to handle and store.

Suitable Materials	Grain, Sawdust, Paddy Straw, Sunflower Stalk, Wood Chips, Forestry Waste
---------------------------	--

Target Feed Animals	Fish, Shrimp, Chicken, Rabbit, Sheep, Pig, Horse, Cattle
----------------------------	--

Technical Specifications

Model Performance Data

Model	Capacity (kg/h)	Motor Power (kw)	Weight (kg)
KL120	50-60	2.2	50
KL150	70-90	3	80
KL180	80-100	5.5	320
KL200	190-320	5.5	480
KL210	300-420	7.5	530
KL230	400-470	7.5	650
KL260	550-700	11	730
KL300	900-950	22	1110
KL400	1000-1200	22	1250
