

Diesel Engine Centrifugal Water Pump

This self-priming centrifugal pump is designed for high-volume water transfer. The robust diesel engine ensures reliable power and efficient operation for irrigation, construction, and dewatering.

Product Overview

High-Performance Diesel Water Pump

This self-priming centrifugal water pump is engineered for high-volume water transfer across industrial and agricultural applications. Built with a robust diesel engine and durable cast iron housing, it ensures reliable operation in demanding environments. The unit is mounted on a sturdy steel frame, providing excellent stability and portability for tasks such as irrigation, construction, and dewatering.

Technical Specifications

Pump Type	Self-priming centrifugal
Construction Materials	Cast Iron Housing, Durable Impeller, Steel Frame
Starting Method	Recoil starter

Applications

Suitable Applications

- Agricultural Irrigation
- Construction Dewatering
- General Industrial Water Transfer
