

Diesel Engine Common Rail Fuel Injector

This diesel fuel injector is designed for precise fuel delivery in common rail systems. It ensures optimal combustion and reliable engine performance under various driving conditions.

Overview

High-Precision Common Rail Injection

This diesel engine common rail fuel injector is designed for precise fuel delivery and optimal combustion efficiency. Engineered to meet stringent emission standards, it provides reliable operation across various driving conditions. The use of high-quality materials ensures extended durability and consistent performance for heavy-duty automotive applications.

Technical Specifications

Injection System

Common Rail • Diesel • Direct Injection

Compatibility

Compatible Engine Models

4HK1, 6HK1, 4HJ1, 4HL1, 6HL1, 6WG1

Compatible Equipment Brands

ISUZU, HITACHI, JCB

Model Reference

Part Number Reference Table

Part Number	Engine/Series	OEM Reference
095000-5511	ISUZU/HITACHI	8976034154
095000-6980	ISUZU/JCB	8980116040
095000-5001	4HJ1	8973060713
095000-5342	4HK1/6HK1	8976024854
095000-5510	6WG1	8976034152
294000-0039	HP3 4HK1	8-97306-044-9

Pump Systems

Supported Pump Types

- HP3 Series
- HP4 Series
- HP0 Series

Performance

Key Performance Benefits

- Optimal fuel atomization
- Improved engine performance
- Stringent emission compliance
- Long-term operational durability
