

Diesel Engine for Generators 10-50kW

These diesel engines are designed to power generator sets. They are available in models ranging from 10kW to 50kW.

Product Overview

Reliable Diesel Power Solutions

This range of diesel engines is specifically engineered for generator sets, offering power outputs between 10kW and 50kW. Designed for budget-conscious applications without compromising on reliability, these engines are suitable for various generator configurations. The series includes multiple models, such as the QC and N series, providing versatile options for different power generation requirements.

Engine Models

Available Engine Models

QC6112ZLD, QC4112ZLD, QC380D, QC385D, QC480D, N485D, QC490D, 4JR3ABD
