

Diesel Engine Fuel Injection Plunger

This fuel injection plunger is designed for diesel engines. It is compatible with the A103 fuel system and the 6QA1 engine model.

Overview

High-Precision Fuel Injection Plunger

This fuel injection plunger is a critical component designed for high-performance diesel engine fuel systems. Engineered for durability and efficiency, it features a robust Gcr15 material construction to ensure long-lasting service life. It is specifically compatible with the 6QA1 engine model and the A103 fuel system, making it an essential part for maintaining optimal fuel delivery and combustion.

Technical Specifications

Model Number	131151-8620
Diameter	12 mm
Material	Gcr15
Engine Compatibility	6QA1
Fuel System Type	A103

Engine Details

Stroke	4 Stroke
Cylinder Type	Multi-cylinder
Carburettor Type	Downdraft

Certifications & Standards

Certifications
ISO9001

Compatibility Reference

Compatible Part Numbers

Part Number	Application
131110-9420	A75 ISUZU
131110-9820	A79 ISUZU
131160-0320	A84 NISSAN DIESEL/MITSUBISHI
131160-0420	A85 MITSUBISHI/NISSAN DIESEL
131160-0520	A-86 ISUZU
131160-0620	A87 NISSAN DIESEL/ISUZU
131160-1120	A92 NISSAN DIESEL/ISUZU
131160-1920	02A ISUZU
131160-2220	05A ISUZU/MITSUBISHI/MAZDA
