

Diesel Engine Fuel Injection Pump

High-pressure fuel injection pump designed for efficient fuel delivery in diesel engines. This pump features robust construction and precise metering for optimal engine performance and fuel economy.

Product Overview

High-Performance Fuel Injection Pump

This high-pressure fuel injection pump is engineered for efficient fuel delivery in diesel engines, ensuring optimal performance and fuel economy. Designed to withstand high operating pressures and temperatures, it provides reliable operation even under demanding conditions. Its robust construction and precise metering make it a dependable component for various heavy-duty diesel applications.

Technical Specifications

Voltage	12 V
Model Identifier	HRO
Part Number	094000-1693

Compatibility

Engine Compatibility	Diesel Engines, Heavy Duty
----------------------	----------------------------

Quality & Standards

Manufacturing Origin
Japan
