

Diesel Engine Fuel Injection Pump 3973228

This high-pressure fuel injection pump is designed for diesel engines. It delivers precise fuel metering and timing for optimal combustion and engine performance.

Product Overview

High-Pressure Fuel Injection Pump

This high-pressure fuel injection pump is engineered for diesel engines, providing precise fuel metering and timing to ensure optimal combustion and engine performance. Designed for durability under demanding conditions, the unit is constructed to withstand high pressures and temperatures. It is a critical component for maintaining efficient fuel delivery and minimizing emissions in heavy-duty applications.

Technical Specifications

Part Number	3973228
Base Pump Number	4921431
Model	CCR1600
Serial Number	17182688154
Production Date	2018-10-04

Application & Compatibility

Application	Diesel Engine, Semi-trailer Tractor
Manufacturing Origin	China
