Overview

High-Performance Diesel Power

This robust diesel engine generator set is engineered for reliable, high-performance power generation in demanding environments. Featuring a powerful vertical duplex, 4-stroke air-cooled engine, it delivers consistent output suitable for construction sites and critical backup power applications. The unit is equipped with electric start and automatic voltage regulation to ensure ease of use and stable power delivery.

Available Models

JCED16000XE, JCED16000XE-3, JCED16000XES, JCED16000XES-3

Electrical Performance

Power Output

12 KVA

Max Output

11 KVA

Rated Output

Voltage Configuration

115/230V (Single-phase) or 230/400V (Three-phase)
