

Diesel Engine Piston with Ring Carrier

This diesel engine piston features a ring carrier for enhanced performance. High-performance materials ensure the piston's lifecycle and tolerance.

Overview

High-Performance Diesel Engine Piston

This diesel engine piston with a ring carrier is engineered for durability and optimal performance in heavy-duty applications. Designed specifically for BFL912 engines, this component ensures consistent compression and reliable operation. Built to precise OEM specifications, it serves as an essential replacement part for maintaining engine efficiency.

Compatibility & Identification

Compatible Engine

BFL912

OEM Reference Numbers

02137974, 02231658

Place of Origin

Hebei, China

Technical Dimensions

Key Physical Specifications

102 mm

Diameter

1.97 kgs

Weight per Piece

4.45 mm

Piston Protrusion

Detailed Measurement Table

Dimension	Value
Compression Height	69.1mm
Total Height	123.6mm
Pin Size	40*80mm
Recess Diameter	58mm
Recess Depth	17.6mm
