

Diesel Engine Water Pump for Irrigation and Construction

This diesel water pump provides efficient and reliable water transfer for various applications. Its robust diesel engine ensures powerful performance and durability.

Overview

High-Performance Diesel Water Pump

This diesel-powered water pump is engineered for demanding environments, making it an ideal solution for large-scale farmland irrigation, construction sites, and emergency water supply needs. Available in a range of sizes from 2 to 6 inches, it offers versatile performance tailored to specific flow requirements. With options for both manual and key-start ignition, this pump combines robust durability with operational convenience for professional users.

Technical Specifications

Available Sizes

- 2 inch
- 3 inch
- 4 inch
- 6 inch

Starting Mechanisms

Hand Start • Key Start

Compatible Engine Models

188F, 190F

Applications

Primary Applications

- Farmland Irrigation
- Construction Engineering
- Breeding Operations
- Emergency Water Supply

Maintenance & Design

Maintenance Profile

Simple maintenance requirements for reduced downtime and operational efficiency.
