Product Overview

High-Performance Industrial Water Pumping Solution

This diesel-powered water pump set is engineered for high-volume water transfer in demanding environments, offering a reliable alternative where electric power is unavailable. Featuring a robust diesel engine coupled with a high-efficiency centrifugal pump, the unit is designed for durability and consistent performance. It is mounted on a heavy-duty steel skid to ensure stability, easy transportation, and rapid deployment for irrigation, dewatering, and industrial water supply applications.

Performance Metrics

Engine Power

163 kW

Power Output

Flow Rate

1000 m³/h

Flow Capacity

Technical Specifications

Key Components

- Diesel-driven engine
- Centrifugal water pump end
- Heavy-duty steel skid mount
- Integrated radiator cooling system
- Control panel for monitoring
- Bottom valves and inlet/outlet piping

Compatible Pump Types

Open Pumps, Mixed Flow Pumps, Sand Pumps, Mortar Pumps

Applications

Primary Applications

Irrigation • Dewatering • Emergency Water Supply • Fire Suppression • Industrial Water Supply
