

Diesel Engine with Turbocharger

This is a diesel engine equipped with a turbocharger, air compressor, and fuel injection system. It includes a cooling fan, belt-driven accessories, and various hoses and electrical connections.

Overview

High-Performance Diesel Engine

This robust diesel engine is engineered for heavy-duty applications, featuring an integrated turbocharger for enhanced power output and efficiency. Designed with a comprehensive fuel injection system and advanced filtration components, it ensures reliable performance under demanding conditions. The unit comes fully equipped with essential accessories, including a cooling fan and belt-driven systems, making it a versatile solution for various automotive and industrial power requirements.

Technical Specifications

Model Designation	MGK 300
Engine Type	Diesel

Key Components

Integrated Systems

- Turbocharger
- Air Compressor
- Fuel Injection System
- Multi-stage Filtration

Included Accessories	Cooling Fan, Belt-driven Accessories, Heavy-duty Hoses, Electrical Connections
