

Diesel Forklift Truck

The forklift truck is a powerful and versatile material handling equipment designed for lifting and transporting heavy loads. It has a lifting capacity of up to 2.5 tons, a maximum lifting height of 3 meters, and a diesel engine.

Overview

Versatile Material Handling

This diesel forklift truck is a powerful material handling solution designed for lifting and transporting heavy loads in industrial and commercial environments. Built with a robust chassis and reliable diesel engine, it offers consistent performance for warehouse operations, construction sites, and manufacturing facilities. The unit prioritizes operator safety through integrated load sensors and emergency stop systems.

Performance Specifications

Lifting Capacity

2.5 tons

Max Load

Maximum Lifting Height	3 m
Engine Type	Diesel

Safety & Features

Key Components

- Robust Chassis
- Lifting Mast
- Forks
- Driver's Cabin

Safety Systems	Operator Presence Detection, Load Sensors, Emergency Stop
