

Diesel Fuel Injection Nozzle for Volvo

This fuel injection nozzle is designed for diesel engines and is compatible with Volvo models. It optimizes fuel atomization and spray processes, which are critical for engine performance and emissions.

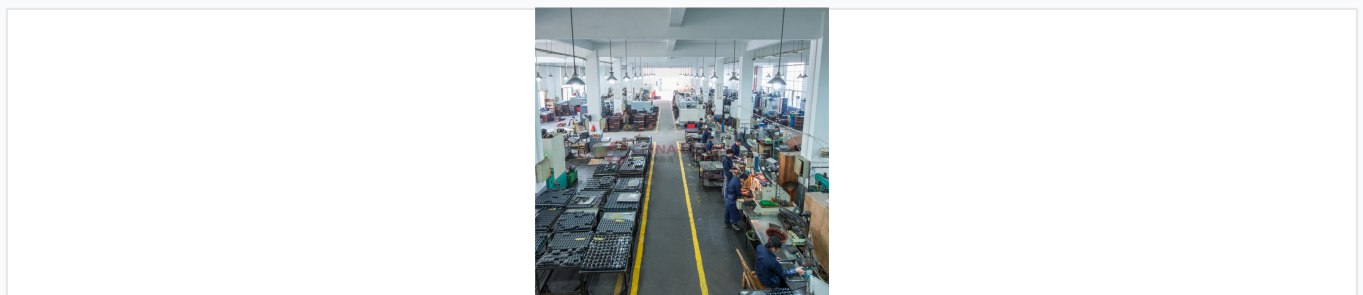

Product Overview

High-Precision Common Rail Injection

This diesel fuel injection nozzle is designed for optimal fuel atomization and spray processes, which are critical for engine performance and emission control. Engineered for multi-cylinder diesel engines, it ensures precise fuel delivery into the combustion chamber while maintaining a high-pressure seal. These components are built to withstand demanding operating conditions, providing a reliable alternative for professional fuel system maintenance.

Technical Specifications

Unit Weight

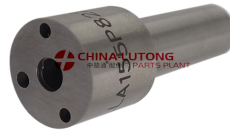

0.04 kg

Weight

Body Material	Steel
Fuel Type	Diesel
Cylinder Configuration	Multi-cylinder
Carburettor Type	Downdraft
Stroke	Standard

Reference & Compatibility
