

Diesel Fuel Injection Plunger for Hino EL100

This diesel fuel injection plunger is designed for optimal fuel delivery in Hino EL100 engines. It is precision-engineered for consistent fuel injection and improved engine efficiency.

Product Overview

Precision Fuel Injection Component

This high-precision diesel injector pump plunger is specifically engineered for Hino EL100 engines. Designed to meet rigorous performance standards, it ensures consistent fuel delivery and optimal combustion efficiency. Constructed from durable Gcr15 material, this component provides excellent resistance to wear and corrosion, making it an ideal choice for reliable engine maintenance and repair.

Technical Specifications

Part Number	131151-5120 / A67
Material	Gcr15
Diameter	12 mm
Compatible Engine	Hino EL100
Fuel Type	Diesel
Stroke	4 Stroke
Certifications	ISO9001

Product Details

Component Type	Fuel Injection Device
Color	Silver
Origin	Fujian, China
