

Diesel Fuel Injection Plunger Pump

This plunger pump is designed for diesel fuel injection systems. It ensures optimal fuel delivery and combustion efficiency.

Product Overview

High-Precision Diesel Injection Component

This high-precision plunger injection pump is engineered specifically for diesel fuel vehicles, ensuring optimal fuel delivery and enhanced combustion efficiency. Built from durable Gcr15 material with an aluminium body, it is designed to meet stringent quality standards for reliable performance. This component is suitable for a wide range of diesel engine applications and is certified for quality management.

Technical Specifications

Model Number	131151-8120
Plunger Diameter	12 mm
Materials	Gcr15, Aluminium

Engine Compatibility

Engine Type	4-Stroke, Multi-cylinder
Fuel Type	Diesel
Carburettor Type	Downdraft

Certifications & Standards

Certifications
ISO9001
