

Diesel Fuel Injection Pump

This diesel fuel injection pump is designed for use in engine systems. It is also compatible with K19/K38/NT855 models.

Product Overview

High-Performance Diesel Fuel Injection Pump

This diesel fuel injection pump is engineered for reliability and precision in heavy-duty engine applications. Designed to maintain optimal fuel delivery, it ensures consistent engine performance and efficiency. It is a compatible replacement component for a wide range of industrial engine series, supporting long-term operational stability.

Compatibility

Compatible Engine Models

- K19
- K38
- NT855
- M11

Part Category

Diesel Engine Spare Parts, Fuel Injection System
