

# Diesel Fuel Injection Rotor Head

This rotor head is a key component in automotive fuel injection systems, designed for diesel engines. It precisely distributes fuel to the engine's cylinders, ensuring optimal engine performance and fuel efficiency.

## ADDITIONAL IMAGES

## Product Overview

### Precision Diesel Fuel Injection

This DPA&VE Rotor head is a critical component engineered for diesel engine fuel injection systems. It is designed to manage the precise timing and distribution of fuel to engine cylinders, ensuring optimal combustion efficiency. Built with robust construction, this component meets stringent industry standards for durability and reliable performance in demanding engine environments.

## Compatibility & Part Numbers

### Compatible Part Numbers

- 096400-0062
- 7185G-900G
- 146650-0720
- 1468334870
- 146400-8821
- 7123-340R
- 7139-235G

## Technical Specifications

### Key Features

Precision Machined • High Durability • Optimized Timing • Emission Reduction

### Application Type

DPA Fuel Injection Pump, VE Fuel Injection Pump, Diesel Engine
