

Diesel Fuel Injector for Engine Systems

This diesel fuel injector is designed for optimal fuel delivery and combustion efficiency. Its robust construction ensures durability and reliable performance in demanding automotive applications.

Product Overview

High-Performance Diesel Fuel Injector

This diesel fuel injector is engineered for optimal fuel delivery and combustion efficiency in heavy-duty engine systems. Designed with a robust spring mechanism and precision-machined components, it ensures reliable operation and an extended service life under demanding conditions. The unit is built to meet stringent quality standards, providing consistent performance and contributing to reduced engine emissions.

Compatibility

Compatible Engine Series

K19, K38, NT855, M11

Technical Details

Associated Part Numbers

- 301667
- 3016574
- 3016676
- 3016677

Performance Features

Precision-engineered nozzle • Robust construction • Optimal fuel atomization • High durability
