

Diesel Generator Set

This diesel generator set provides reliable power for industrial, commercial, and residential use. It features a durable diesel engine and a soundproof canopy for reduced noise.

Overview

Industrial Power Solution

This industrial-grade diesel generator set is engineered for consistent and reliable power generation in demanding environments. It features a robust, soundproof stainless steel canopy and an anti-vibration mounting system to ensure operational stability and noise reduction. Designed for versatility, the unit supports both prime and standby power applications, offering comprehensive protection through advanced monitoring systems.

Technical Specifications

Canopy Material	2mm cold-rolled stainless steel
Radiator Ambient Capacity	50
Fuel Tank Runtime	8 hours
Governor Options	Mechanical, Electronic

Safety & Control

Emergency Systems

- Low oil pressure shutdown
- High water temperature shutdown
- CHNT circuit breaker

Features

Included Components

Self-excited excitation • Anti-vibration mounting • Flexible fuel lines • Fuel tank drainage • Top lifting points • Forklift holes

Available Upgrades

ATS (Automatic Transfer Switch) • Coolant heater • Oil heater
