Overview

Reliable Power Generation

This diesel generator series offers a robust and reliable power solution designed for diverse industrial, commercial, and emergency backup applications. Engineered for performance, these units feature advanced electronic governors and turbocharged intake systems to ensure stable electrical output. Available in a wide range of power capacities, they are built on heavy-duty frames for durability and ease of installation in various environments.

Technical Specifications

Intake Type	Turbocharged
Governor Type	Electronic
Engine Features	Turbocharged, Electronic Governor

Model Range

Generator Model Specifications

Model	Prime Power	Fuel Cons. 100%	Displacement	Weight
4BTA3.9-G2	63 KVA	12.5 L/H	3.9 L	1080 kg
