

Diesel Generator Set

This diesel generator set features a four-stroke direct injection system, providing substantial power in a compact design. It is equipped with a radiator cooling system, air intake filter, and a control panel for performance monitoring.

Overview

Reliable Power Generation

This diesel generator set is designed for consistent and reliable performance across industrial, commercial, and residential applications. It features a robust engine coupled with a high-efficiency generator, ensuring stable power output. Built on a sturdy base frame, the unit is engineered for easy installation and long-term durability, making it an excellent choice for those seeking quality backup power solutions.

Technical Specifications

Excitation Type	Third-harmonic, self-excited
Voltage Regulation	Constant voltage
Generator Series	STC Series, Brushless Series

Design & Build

Cooling System

Radiator Cooling

Key Components

- Air intake filter
- Control panel with performance gauges

Mounting

Sturdy base frame
