

Diesel Generator Set

This diesel generator set is designed for industrial or commercial power generation. The unit features a diesel engine coupled with an electrical generator, mounted on a sturdy frame.

Overview

Industrial Power Generation

This diesel generator set is engineered for reliable, high-output power generation in industrial and commercial environments. Designed for continuous or backup electricity needs, the unit features a robust, multi-cylinder engine coupled with a high-performance electrical generator. Its sturdy frame construction ensures stability and ease of transport for demanding operational sites.

Certifications

Compliance & Standards	CE, ISO 9001:2008, UL
