Overview

Industrial Power Solutions

This comprehensive series of power generation sets offers a versatile output range from 9 to 3000 kVA, engineered to provide reliable electricity under diverse working conditions. Designed for durability and performance, these units are suitable for demanding environments including oil fields, hospitals, ports, and industrial facilities. The systems feature advanced control technology and robust construction to ensure stable operation in both prime and standby applications.

Power Output Range

9 kVA

Minimum Output

3000 kVA

Maximum Output

Certifications

Certifications & Standards

ISO 9001, ISO 14001, GB/T 28001, CE Qualified

Product Configurations

Available Generator Types

- Open type
- Silent Canopy
- Trailer type (mobile)
- Containerized
- Crawler type (mobile)
- Welding Function

Compatibility

Energy Sources

Diesel • Natural Gas • Biotic Energy • Solar Photovoltaic
