

Diesel Generator Set for Oil Drilling

This diesel generator set is designed for oil drilling and other demanding applications. It features a robust engine coupled with a high-efficiency generator, ensuring a reliable power supply.

Overview

Designed for Extreme Environments

The 140 series generating set is specifically engineered to provide reliable, high-efficiency power for demanding oil drilling applications. Built on a heavy-duty skid, this unit ensures durability and ease of transport to remote, challenging locations. It comes fully equipped with an integrated cooling system, advanced filtration, and a dedicated control panel for precise monitoring and operation.

Technical Specifications

Series Model	140 Series
Primary Application	Oil Drilling, Remote Power, Heavy-Duty

Key Features

Core Components

- Robust Diesel Engine
- High-Efficiency Generator
- Advanced Cooling System
- Integrated Filtration System
- Control Panel Interface

Design Advantages

Heavy-Duty Skid • Easy Transport • High Durability
