Product Overview

Reliable Power Solutions

This diesel generator set is engineered for both prime and standby power applications, offering versatile energy solutions for industrial and commercial needs. It features a robust, weather-resistant enclosure designed for effective noise reduction and long-term durability. Equipped with a high-performance engine and reliable alternator, this unit ensures consistent power delivery and ease of operation for critical infrastructure.

Technical Specifications

Power Output Range

10 kVA

Minimum Output

3300 kVA

Maximum Output

Available Configurations

- Open type
- Soundproof type
- Trailer type
- Containerized type

Certifications & Standards

Certifications

CE, ISO

Ancillary Equipment

Compatible Systems

- ATS Panel
- Synchronizing Panel
- Lighting Tower
- Load Bank
