

Diesel Plate Compactor for Soil and Asphalt

This plate compactor is a robust construction machine designed for soil compaction and asphalt preparation. It features a powerful diesel engine, heavy-duty base plate, and sturdy handle for optimal performance and comfortable operation.

Product Overview

Professional Soil and Asphalt Compaction

This robust plate compactor is engineered for high-performance soil compaction and asphalt preparation in demanding construction environments. Featuring a heavy-duty base plate and a powerful engine, it delivers consistent impact force to ensure stable foundations, smooth road surfaces, and precise landscaping work. Its compact design and maneuverability make it an ideal choice for contractors operating in confined spaces or requiring reliable equipment for daily site operations.

Performance Metrics

Impact Force

30 kN

Impact Force

6.5 hp

Engine Power

Walking Speed	25 m/min
Impaction Depth	20 cm
Climb Ability	20 degree

Technical Specifications

Plate Size	670 x 490 mm
Rotary Speed	5800 rpm

Accessories

Optional Accessories	Wheel Kit, Steel Protector, Rubber Mat
