Overview

Robust Diesel Power Solution

This diesel generator is engineered for reliable, heavy-duty power generation in demanding agricultural and industrial environments. It features a robust, four-cylinder engine design with an integrated radiator cooling system for efficient heat dissipation during continuous operation. Built on a sturdy, stable frame, this unit is designed for easy integration and long-term durability in stationary applications.

Technical Specifications

Engine Configuration	4-cylinder diesel engine
Cooling System	Radiator cooling with fan
Key Components	Fuel filter, Oil filter, Fuel injection system, Monitoring gauges

Design & Build

Best For

Agricultural • Industrial • Stationary Power

Construction	Stationary frame-mounted
