

Diesel Powered Concrete Trailer Pump

This diesel-powered concrete trailer pump is designed for efficient and reliable concrete placement. It features a high-capacity hopper, powerful pumping unit, and durable chassis for easy transport and maneuverability.

Overview

High-Performance Concrete Placement

This diesel-powered trailing concrete pump is engineered for efficient and reliable concrete placement across diverse construction applications. It features a robust design with a high-capacity hopper and a powerful pumping unit, ensuring consistent performance on demanding job sites. Built for durability and mobility, the chassis allows for easy transport and maneuverability, while advanced control systems provide the precision and safety required for professional operations.

Technical Specifications

Power Source	Diesel Engine
Equipment Type	Trailing Concrete Pump

Key Features

Performance Highlights

1 unit High-Capacity Hopper	1 unit Integrated Control System
---------------------------------------	--

Safety & Operation	Advanced Control System, Operator Protection Features, Durable Chassis
--------------------	--
