

Diesel Powered Fire Pump

This high-performance diesel-powered fire pump is designed for rapid deployment and reliable operation in emergency situations. Featuring a robust V-twin diesel engine, it delivers exceptional pumping capacity and sustained performance.

Overview

High-Performance Fire Pump

This diesel-powered fire pump is engineered for rapid deployment and reliable performance in critical emergency situations. Built with a robust V-twin diesel engine, it delivers high pumping capacity essential for firefighting and industrial water transfer. The unit features a durable, powder-coated frame for enhanced portability and long-term protection in demanding environments.

Engine Specifications

Engine Power

22 HP

Power Output

Engine Configuration	V-Twin Diesel
----------------------	---------------

Construction & Design

Frame Material	Powder-coated steel
Portability	Yes

Operational Features

Monitoring	Pressure Gauges, Control Panel
Hose Connection	Standard fire hose connection

Applications

Primary Applications

- Firefighting
- Water Transfer
- Industrial Applications
