

Diesel Powered Heavy-Duty Tractor

The diesel tractor is a robust vehicle suited for heavy-duty towing and pushing tasks. Its compact design and maneuverability make it suitable for use in confined spaces.

Overview

Robust Heavy-Duty Performance

The QD60/QD80 diesel tractor is a robust and reliable vehicle engineered specifically for demanding heavy-duty towing and pushing applications. Designed with a durable chassis and heavy-duty axles, it ensures long service life even in the most challenging industrial environments. Its compact footprint and excellent maneuverability make it an ideal solution for confined spaces in aviation, manufacturing, and logistics sectors.
