

Diesel Powered Industrial Tractor

This diesel tractor is designed for towing and pushing heavy loads in industrial and airport environments. It features a robust chassis, powerful diesel engine, and hydraulic systems for efficient operation.

Overview

Industrial Towing Solution

This diesel-powered industrial tractor is engineered for high-performance towing and pushing of heavy loads in demanding environments such as airports and logistics facilities. It features a robust, durable chassis paired with a powerful diesel engine and advanced hydraulic systems to ensure efficient, reliable operation. Designed with operator comfort and safety in mind, it provides a secure and effective solution for aircraft towing, cargo handling, and general equipment transport.

Performance

Primary Applications	Aircraft Towing, Cargo Handling, Equipment Transport
Power Source	Diesel Engine

Technical Features

Core Systems

- Robust Industrial Chassis
- High-Performance Diesel Engine
- Integrated Hydraulic Systems

Operator Environment

Comfortable Cabin • Safety-Focused Design
