

Diesel Water Pump for High-Volume Transfer

This diesel water pump is designed for high-volume water transfer. It features a robust air-cooled diesel engine for reliable performance in demanding environments.

Product Overview

High-Volume Diesel Water Pump

This diesel-powered water pump is engineered for high-volume fluid transfer in demanding industrial and agricultural environments. Built with a robust air-cooled diesel engine, it ensures reliable performance and longevity even under heavy workloads. Its protective frame design enhances durability, making it an ideal solution for large-scale irrigation, construction site dewatering, and versatile fluid management tasks.

Technical Specifications

Design Features

Protective Frame • High-Volume Capacity • Air-Cooled

Engine Type	Air-cooled diesel engine
Primary Applications	Irrigation, Construction, Water Transfer
