

# Digital Air Fryer with Multiple Cooking Racks

This digital air fryer is designed for air frying, baking, roasting, and grilling. It features a digital control panel for precise temperature and time settings and includes multiple rack positions for cooking various types of food simultaneously.

## ADDITIONAL IMAGES

## Overview

### Versatile Digital Air Fryer

The AF-60A is a multi-functional kitchen appliance designed for professional-grade air frying, baking, roasting, and grilling. Featuring an innovative digital display and rapid air circulation technology, it delivers crispy textures with minimal oil usage for healthier meal preparation. The spacious interior with three cooking layers and a crystal-clear XL window allows for efficient, high-volume cooking and easy monitoring.

## Key Performance Metrics

### Performance Highlights

**3 Racks**

Cooking Layers
