

Digital Body Composition Analyzer with LCD

This digital scale provides a comprehensive body composition analysis. It measures weight, body fat percentage, muscle mass, and other key health metrics using bioelectrical impedance analysis (BIA) technology, displayed on a large LCD screen.

Product Overview

Comprehensive Health Monitoring

This digital body composition analyzer provides a complete picture of your health metrics using advanced bioelectrical impedance analysis (BIA) technology. It goes beyond simple weight measurement to track body fat, water, muscle, and bone percentages, while also calculating BMI and daily calorie intake requirements. Designed for efficiency and ease of use, it supports up to 12 individual user profiles, making it an excellent tool for fitness centers, wellness clinics, or personal health management.

Technical Specifications

Maximum Capacity	180 kg
Measurement Division	100 g
Power Source	3x 1.5V AAA batteries
User Memory	12

Measurement Capabilities

Additional Features

- BIA Principle Technology
- Calorie intake requirement calculation
- Automatic user recognition
- Large LCD display

Metrics Measured	Weight, Body Fat %, Body Water %, Muscle Mass %, Bone Mass %, BMI
