

# Digital Body Composition Scale with Bluetooth

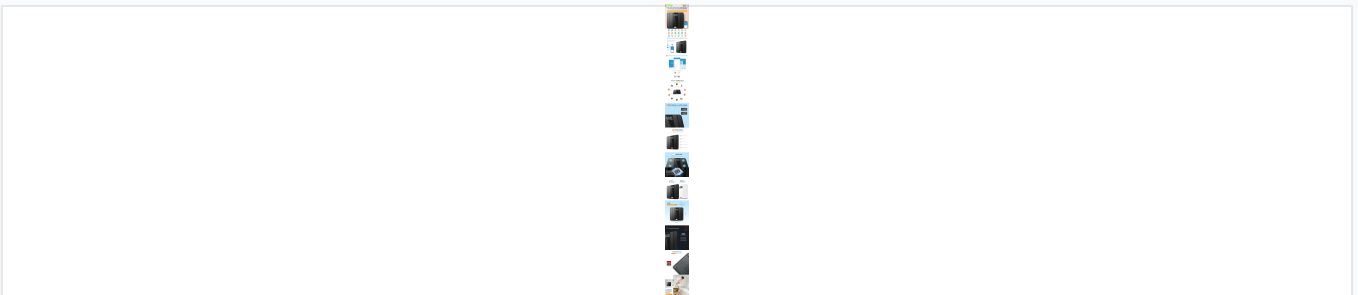

This digital scale measures body composition metrics, including weight and body fat percentage. It uses Bluetooth to sync data with iOS and Android devices.

## ADDITIONAL IMAGES

## Overview

Comprehensive smart scale featuring BIA technology, multi-user support, and mobile app integration.

### Smart Body Composition Analysis

This Digital Body Composition Scale utilizes advanced ITO (Indium Tin Oxide) coating technology and BIA biometric sensors to provide highly accurate health metrics. With seamless Bluetooth 4.0 connectivity, it synchronizes with iOS and Android devices to track over 18 essential health indicators. Designed for the modern household, it supports up to 8 unique user profiles and integrates with popular fitness platforms like Google Fit and Fitbit.

## Key Features

### Key Performance Metrics

**18**

Health Indicators

**8**

User Profiles

**4**

High-Precision Sensors

## Technical Specifications

### Connectivity

Bluetooth 4.0 • iOS Compatible • Android Compatible

### Product Size

310 x 319 x 24 mm

### Power Supply

4 x AAA batteries

### Display

Large LCD with white digits

## Measurement Capabilities

### Supported Units

- Kilograms (kg)
- Pounds (lb)
- Stone (st:lb)

### Tracked Body Metrics

Body Weight, Body Fat %, Bone Mass, Muscle Mass, BMI, Body Water %

## Smart Features

### App & Software Features

- 14 Language options
- Data sync with Google Fit
- Data sync with Fitbit
- Data sync with Health Fit
- Auto-connection via Bluetooth

## Safety & Convenience

### Operating Features

Auto-power-off, Auto-zero, Low battery indication, Overload indication, Non-slip feet

## Design

### Available Finishes

- Classic Black
- Elegant White

### Surface Technology

ITO (Indium Tin Oxide) Coated Glass
