

Digital Body Composition Scale with LCD Display

This digital bathroom scale provides accurate weight measurements and comprehensive body composition analysis. It features a clear LCD display, multiple user profiles, and measures weight, body fat percentage, body water percentage, muscle mass, and bone mass.

Product Overview

Advanced Body Composition Analysis

This digital body composition scale offers precise weight measurements and comprehensive health analysis using advanced bioelectrical impedance analysis (BIA) technology. Designed with a durable tempered glass platform, it provides essential data including body fat, water percentage, muscle mass, and bone mass. With features like multiple user profiles and an athlete mode, it is an ideal solution for monitoring fitness progress for a wide range of users.
