Smart Body Composition Analysis

This advanced digital body composition scale combines precision weighing with comprehensive health tracking, including body fat, hydration, muscle mass, and bone mass analysis. It features an intuitive 5-degree progress color bar system to help users visually track their fitness journey towards specific weight goals. With a durable 6mm tempered glass platform and high-accuracy strain gauge sensors, it provides reliable measurements for up to 12 individual users.

Technical Specifications

Maximum Capacity	180 kg
Graduation	100 g
Power Requirements	3x 1.5V AAA batteries
Sensor Technology	High strain gauge sensor

Dimensions and Design

Scale Dimensions	319x319x24mm
LCD Display Size	44x91mm
Platform Material	6mm tempered glass

User Features

Trackable Metrics

- Weight (kg/lb/st.lb)
- Body fat %
- Body water %
- Muscle mass
- KCAL
- Bone mass

Progress Indicator

- 20% completion
- 40% completion
- 60% completion
- 80% completion
- 100% completion

Smart Functions

Step-on technology • Auto off • Overload indication • Low battery indication

Memory Capacity	12
