

Digital Body Fat and Hydration Scale

This digital scale measures body fat percentage and hydration levels. The sleek black glass surface features metallic sensor pads and a digital screen for easy reading.

Product Overview

Comprehensive Body Composition Monitoring

This digital body fat and hydration scale utilizes BIA (Bioelectrical Impedance Analysis) technology to provide precise insights into your body composition. Beyond basic weight measurement, it tracks body fat percentage, hydration levels, and calculates BMI and daily caloric requirements. Designed for durability and ease of use, it features a 6mm tempered glass platform and an intuitive interface suitable for up to 12 individual users.

Technical Specifications

| | |
|------------------------|-----------------------------|
| Maximum Capacity | 150 kg |
| Division/Graduation | 100 g |
| Platform Material | 6mm Tempered Glass |
| Power Source | 1x 3V Lithium Cell (CR2032) |
| LCD Display Dimensions | 74 x 28.5 mm |

Measurement Features

Key Performance Metrics

| | |
|-------------------------------|--|
| 150 kg Max Capacity | 12 users User Profiles |
| Available Measurements | Body Fat %, Hydration %, Weight, BMI, Calorie Calculator |
| User Memory Capacity | 12 |
| Measurement Principle | BIA (Bioelectrical Impedance Analysis) |
