Product Overview

Comprehensive Health Monitoring

This high-accuracy digital body fat scale is designed for precise health tracking, measuring weight, BMI, BMR, body water percentage, muscle mass, bone mass, and body fat. Utilizing advanced BIA biometric technology and four high-precision strain gauge sensors, it ensures consistent and reliable data. The device features a large, easy-to-read LCD display and supports memory for up to 10 user profiles, making it an excellent tool for individual or family fitness monitoring.

Performance & Capacity

Measurement Metrics

- Weight
- Body Mass Index (BMI)
- Basal Metabolic Rate (BMR)
- Body Water Percentage
- Muscle Mass
- Bone Mass
- Body Fat Percentage

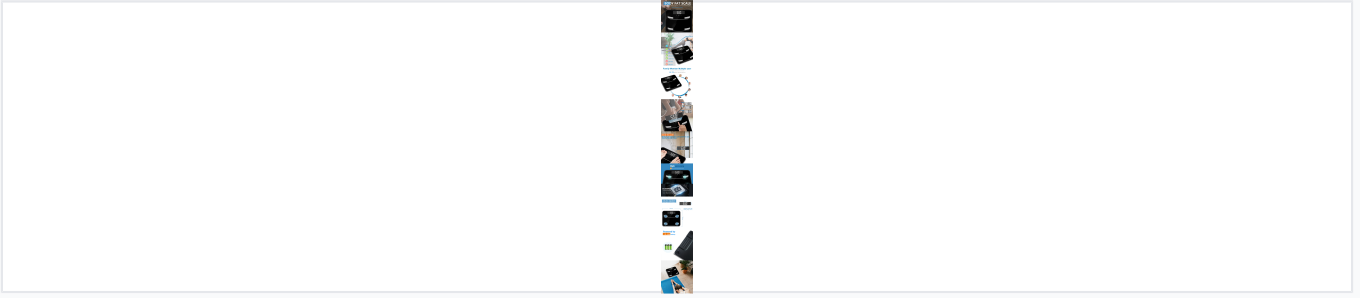

Maximum Weight Capacity

180 kg

User Profile Memory

10 users

Technical Specifications

Overview of measurement metrics, user memory capacity, and technical dimensions.

LCD Display Size	140 x 39 mm
Scale Dimensions	320 x 280 mm
Power Requirements	3 x AAA batteries
Sensor Technology	BIA Biometric Technology, High-Precision Strain Gauge

Usage & Design

Usage Requirements

Barefoot Use • Electrode Contact Required
