Overview

Comprehensive overview of the scale's features including the 180kg capacity, 6mm tempered glass, and BMI classification standards.

Stylish and Precise Personal Weight Management

This digital body weight scale features a unique 'bling-bling' DIY surface, combining modern aesthetics with high-performance functionality. Built with 6mm safety tempered glass and a low center of gravity, it ensures both durability and stability during use. The high-precision strain gauge sensors provide accurate readings up to 180kg, making it an ideal choice for health-conscious users looking for a stylish addition to their home.

Key Performance Metrics

Performance Metrics

| | | |
|-----------------------------------|---------------------------|--------------------------------|
| 180 kg Maximum Capacity | 0.1 kg Division | 6 mm Glass Thickness |
|-----------------------------------|---------------------------|--------------------------------|

Technical Specifications

| | |
|-------------------------|-------------------------------------|
| Maximum Weight Capacity | 180 kg |
| Graduation/Division | 0.1 kg |
| Sensor System | High-precision strain gauge sensors |
| Power Supply | 1 x CR 2032 battery (included) |

Design & Build

Safety Design

- Low center of gravity to prevent rollover
- Fillet grinding for smooth edges
- Safety tempered glass construction

| | |
|------------------|---------------------------|
| Surface Material | 6mm Safety Tempered Glass |
| Surface Finish | Bling Bling DIY Surface |

Dimensions

| | |
|--------------------|-------------------|
| Product Dimensions | 300 x 300 x 27 mm |
| Display Dimensions | 30 x 73 mm |

Smart Features

Display Type

LCD • LED Display

Automated Functions

- Auto zero resetting
- Auto power off
- Overload indicator (-oL- or Err)
- Low battery indicator (-Lo-)

Health Monitoring

Body Mass Index (BMI)

The scale provides BMI information, an important international standard to measure the degree of obesity and health. It categorizes results into Thin, Normal, Overweight, and Fat for statistical health analysis.
