Detailed view of the scale's construction, display capabilities, and integrated health monitoring features.

Precision Health Monitoring

This high-precision digital body scale is designed for reliable personal health tracking. Featuring a durable 6mm tempered safety glass platform and a low center of gravity to prevent rollover, it combines stability with a sleek, modern aesthetic. The integrated invisible LED display provides clear weight readings, while advanced sensors ensure accurate measurements up to 180kg.

Technical Specifications

Maximum Capacity	180 kg
Platform Material	6mm tempered safety glass
Scale Dimensions	300 x 300 x 27 mm
LED Display Size	33 x 78 mm
Power Source	3x AAA batteries (included)

Features & Functionality

System Indicators

- Low battery warning (Lo)
- Overload indication (oL)
- Error indication (Err)

Key Features

Invisible LED Display, Fillet Grinding Finish, Auto-Power-Off, Low Center of Gravity, High Precision Sensors
