Overview

Precision Measurement Solution

This digital caliper features a high-visibility full-screen display, available in either yellow or black and white LCD options for optimal readability. Constructed from durable, hardened stainless steel, it is designed for consistent accuracy in demanding environments like engineering, machining, and quality control. With support for both metric and imperial units, auto power management, and data output capabilities, this tool offers a versatile and efficient solution for professional measurement tasks.

Technical Specifications

Measuring Range

150 mm
Metric Range

6 in
Imperial Range

Display Options

Yellow LCD, Black & White LCD

Power Supply

3V Battery

Features

Core Functionalities

- Full-screen display for easy reading
- Switchable MM/INCH units
- Auto power on/off functionality
- Integrated data output port
- Zeroing function for differential measurements

Construction

Material

Hardened Stainless Steel
